

ERASMUS EXPERIENCE

WHY I DID IT?

It's the best way to improve your English and your skills in living by yourself in a different atmosphere. It's a unique opportunity and I think that everyone should try it. I really recommend it.

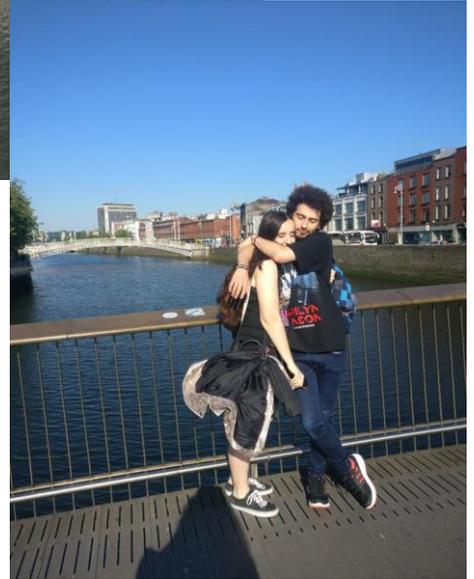

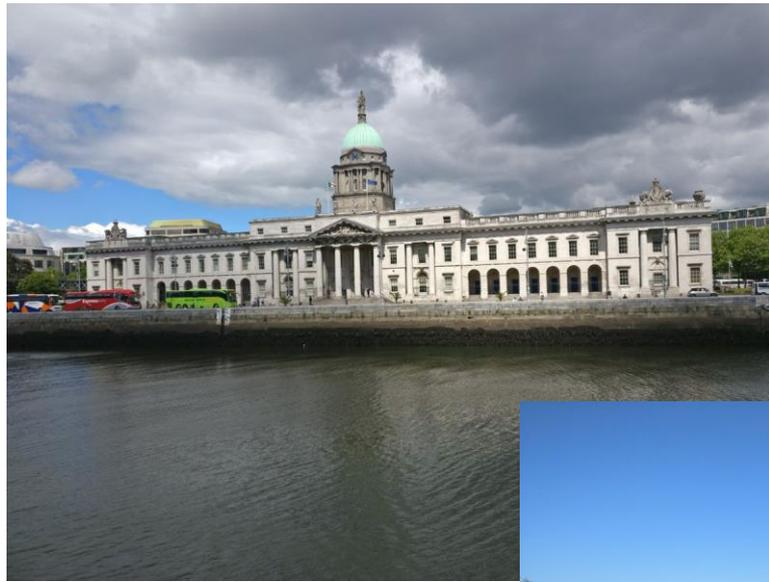

PREVIOUS TIME

You have to be conscious that you are going to be in a different place where everything is different and you have to get used to it. I was really quiet because I knew what it was coming.

FIRST IMPRESSIONS

As far as culture is concerned, it is fascinating. The further north you go, the more ancient Celtic culture stands out. Dublin is an amazing city in every way. People are usually friendly, always providing a warm impression. The rain feature was not at all annoying to me, on the contrary, it was nice. Angela, who welcomed us, treated me like her own son. She is a great person who I am immensely grateful to have welcomed me into her home and to have treated me as one of the family.

SOME PICTURES OF THE CITY

WORK EXPERIENCE

I have been working at MicroPro Computers with 5 other workers. It is a computer science company, based on the repairs of computers, tablets and phones to the sale of any type of electronic device, printers and computers. I worked from 9:00 a.m. to 6:00 p.m. The boss was Paul Maher, responsible for giving me work to do.

MY TASKS IN MICRO PRO

I usually set up operating systems and programs. Also clean viruses from computers, update and repair them. When I did not make installations and repairs, I used to help in the store attending clients, repairing printers and configuring them and pointing out customer data. My assessment of work experience has been excellent. I think that the work that has been assigned to me was correct and adequate to my level. I have been treated like one more and have always been told what I was doing well and what I was doing wrong, which I valued a lot. Being always dealing with the engineers made me learn a lot in everything related to repairs and installations. I really have the feeling that every day I went home knowing something else, and I think that is the job of doing work practices. I have no complaints, I have been treated to perfection and work has enchanted me.

FINAL ASSESSMENT

It was an unforgettable experience, both for work and for culture. I truly recommend it.

Álvaro Padilla.
