My motivation

- I wanted to improve my english level, have my first work experience out of Spain and the most important, I didn' t want to miss a big oportunity like this to enjoy new things in another country.

Before this experience

- Before taking this trip I had to be conscious that I will be doing things by myself in another country with different culture, basically, I had to be aware of how to adapt to this new place.

First Impression

The very first days I was staying here, I noticed that everything is very different. The food, the constructions and architecture, etc. I loved everything I saw here. People are very kind, the natural beauty of this country is very lovely

Work experience

I worked at Waterford Computer Clinic with my friend Asier. It was a nice experience, we learned how to build and online shop, sometimes we repaired some old laptops and helped customers with their problems.

Work experience

We worked from 10:00 to 18:00 and we could get every break we wanted to.

We used to eat lunch between 13:00 and 14:00.

Other Workers

We only had 3 more workers besides me and Asier. They are Jagrat, Gyena and Gleb, this last one is the owner of the clinic. They were very kind with us all the time and even invited us to a business dinner!

Free time

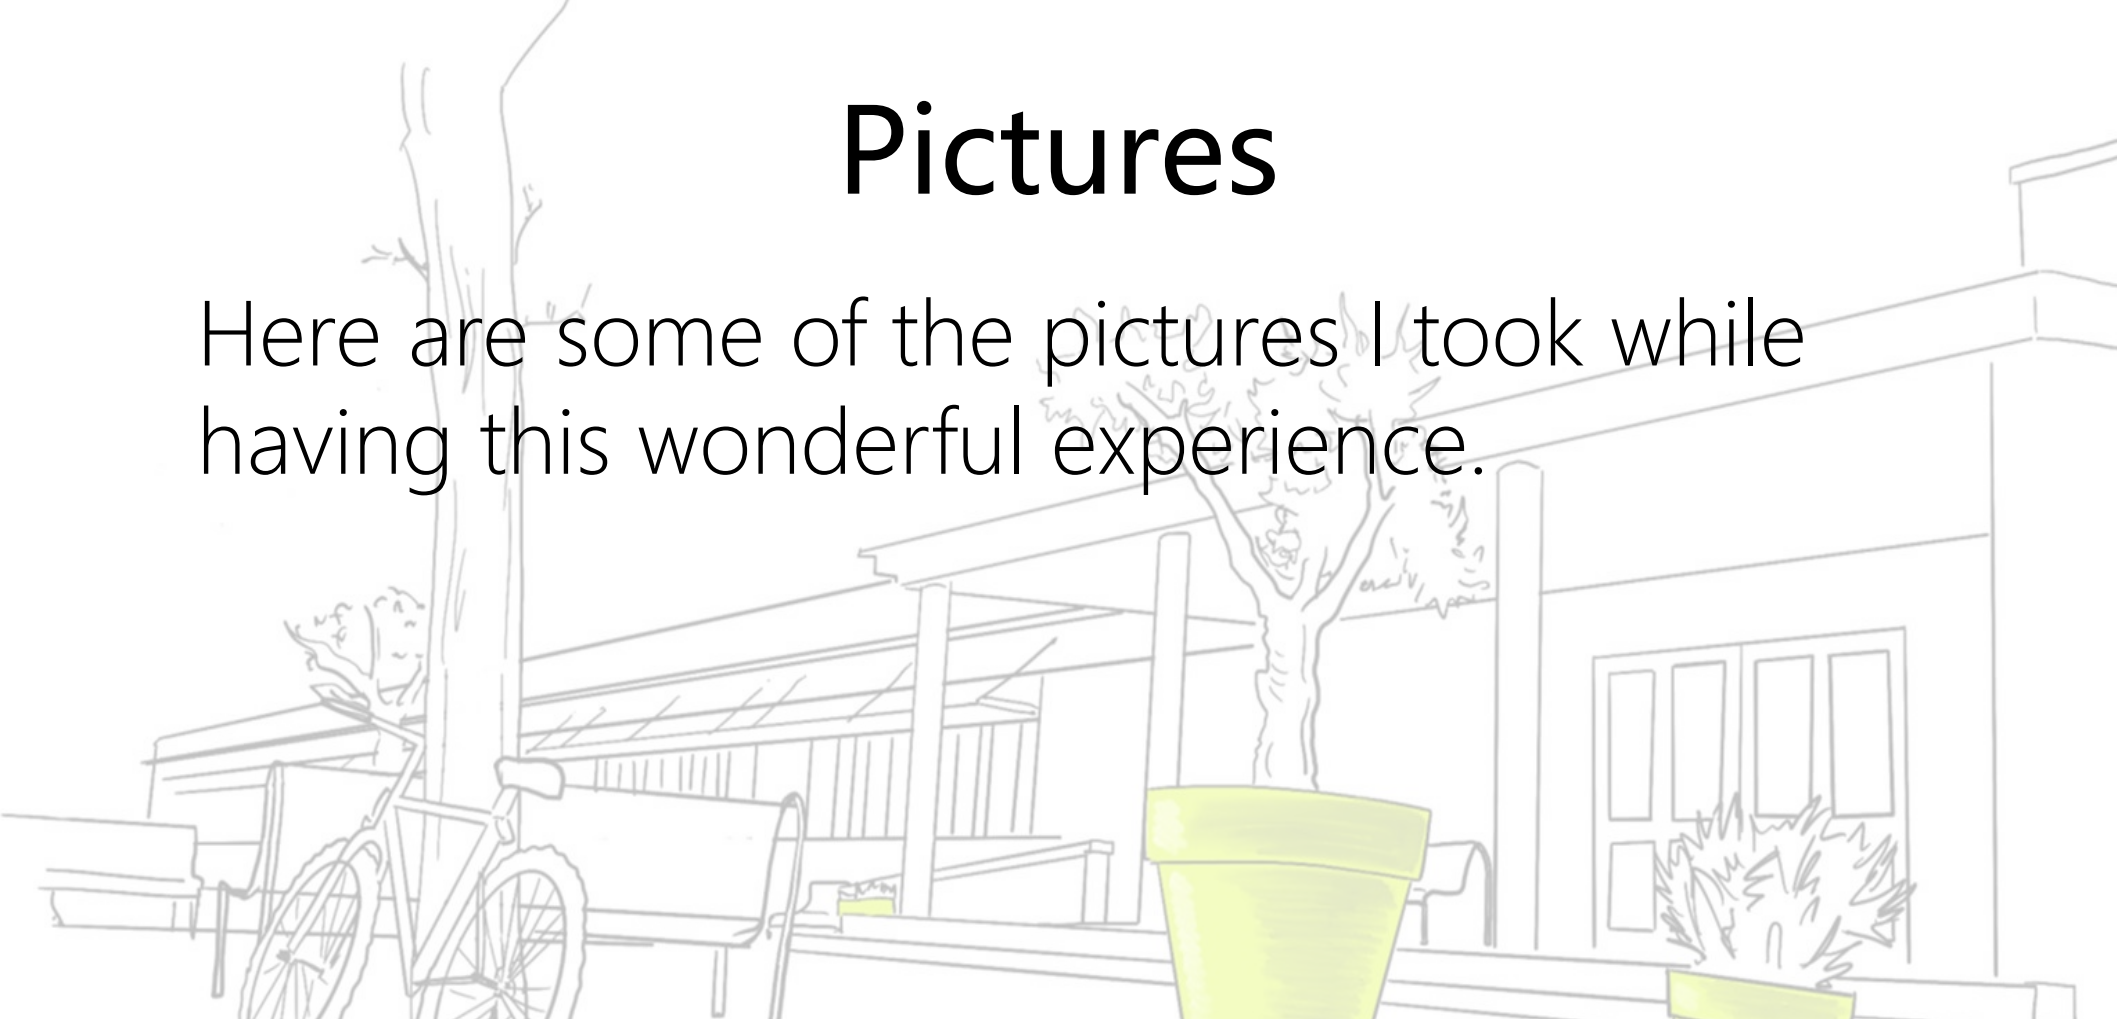

In my free time I used to go with the other students to different places around Waterford and Ireland. We went to Dublin, Cork, and Tramore (a small city next to Waterford with very beautiful beaches and an amusement park)

Host Family

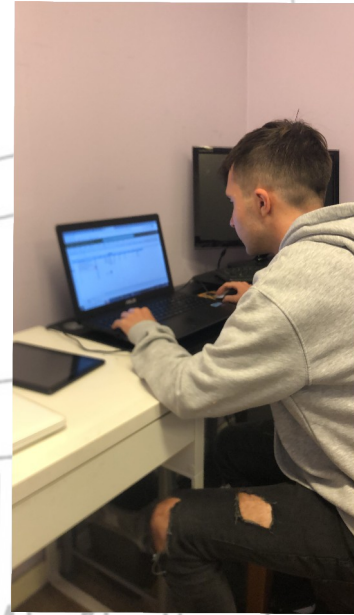

My host family was Renné and her daughter Louise. Renné is a very nice lady that helped me with everything, knew what I needed and always needed to be sure that I was enjoying her company. Her daughter was really nice too, she always prepared my packed lunch.

Pictures

Here are some of the pictures I took while having this wonderful experience.

Pictures

Final Assessment

- This was a unforgettable experience and I would love to come back to enjoy more the beauty of this country
